SUMMARY

Business Analytics & AI and Supply Chain Analytics double major at UT Dallas (3.8 GPA, accelerated program) who builds data and AI systems for real operational problems. Built a RAG-based data quality agent at KPMG Digital Lighthouse, founded an AI predictions product, and ran procurement and a full budget as a head chef.

EDUCATION

The University of Texas at Dallas — Richardson, TX

Expected Dec 2027

B.S. Business Analytics & AI | B.S. Supply Chain Analytics | GPA 3.8

Relevant Coursework: Programming for Data Science, SAP S/4HANA, Quantitative Business Analysis

EXPERIENCE

Digital Transformation Intern — KPMG

Jun 2026 – Aug 2026

Digital Lighthouse

- Built Veritas ("Agent 6" of a 9-agent SAP master data pipeline) using retrieval-augmented generation over 200+ curated rules and cross-LLM prompt engineering across Claude and Gemini to generate business-grounded SAP data quality rules.
- Authored a SAP S/4HANA field-reference schema covering 18 tables and approximately 940 fields, establishing the master data foundation the agent reasons over.
- Generated data quality rules across all six DQ dimensions — completeness, accuracy, consistency, validity, uniqueness, and timeliness — grounded in client business context rather than generic templates.

Founder — Setpiece

2026 – Present

Independent AI Venture | Pre-launch, in active development

- Architected an AI agent that ingests live player and match statistics to generate data-backed football predictions, owning the full stack from data pipeline through model logic to user-facing output.
- Built the ingestion and feature pipeline in Python, transforming raw match and player statistics into model-ready inputs with automated validation.

Contributor — TailTech Inc.

2025 – Present

B2B White-Label SaaS Platform for Pet Care Services

- Contributed product and architecture strategy to a B2B white-label SaaS platform that gives pet care businesses their own branded mobile app.
- Helped drive migration to a single containerized Flutter app with runtime theming, replacing per-client builds and collapsing release overhead.

Head Chef & Kitchen Operations Lead — Scentral Park

Feb 2024 – Jul 2025

Bengaluru, India

- Managed the full operational budget and procurement end to end, reducing food waste by 40% while maintaining 100% service availability and strict safety compliance.
- Led a 5-member team to standardize kitchen workflows, improving output consistency and cutting peak-hour processing time by 25%.

TECHNICAL SKILLS

Languages & Data: Python (Pandas, NumPy), SQL (Oracle), Excel (pivot tables, VLOOKUP)

AI & ML: LLM prompt engineering, retrieval-augmented generation (RAG), multi-agent systems, Monte Carlo simulation

Platforms & BI: SAP S/4HANA, Tableau, FastAPI, React, Git, VS Code

Domain: Data quality and master data management, demand forecasting, procurement

LEADERSHIP & ATHLETICS

Professional Cricketer & Team Captain — Division 1, Bengaluru, India

2019 – 2023

- Captained the squad through four years of high-stakes tournaments, making real-time strategic decisions and leading a full squad under sustained competitive pressure.
